Examiner : TRAN, ANDREW Q

Attorney docket No.: 28944/41082

Title of the invention: METHOD AND DEVICE FOR CHARACTERIZING
FERROELECTRIC MATERIALS

Commissioner for Patents
P.O. Box 1450
Alexandria VA 22313-1450

DECLARATION

Sir:

The inventors of the patent application US 10/528,395, declare hereby that the bibliography reference: "Über die Magnetische Nachwirkung" Z. Phys. 94, 277-302 (1935) has been cited in the application (page 1, line 27 of verified translation of PCT/FR2003/002729) without the inventors having read it.

They also declare that they could not obtain this article by asking for it in French and German libraries. A reason for this is that this article was published in an old German review in the 1930s, and that this review does not exist any longer.

Date:

le 14 novembre 2005.

Lionel CIMA

Eric LABOURE
